Subject: Project Idea For Your Consideration

For the past 18 months Range has been working with URS on an air monitoring and modeling project. To date, Range has committed approximately \$600,000 to the effort as well as a great deal of technical consultation and data. My thought is that this project could serve as the nucleus for an expanded project with the EPA and perhaps could include PADEP. This project is intended to analyze an issue of critical importance to the industry and the nation and has the potential to be very impactful. In addition, it is consistent with the recommendations made by the DOE Panel last year. In the hope you might be interested in this sort of joint effort, I have asked URS to define an expanded project scope for our mutual consideration. I look forward to your thoughts on the matter.
